MICROSOFT DYNAMICS GP 2018 WILL BE SUPPORTED ON WINDOWS 7

Due to customer demand, Microsoft has changed system and client requirements to include Windows 7 work stations.

If you're planning to upgrade to GP 2018 or need more information about it, you can log in to Microsoft CustomerSource ([click here](#)) for **detailed system requirements**.

TitaniumGP Copy/Paste

Copy/Paste between Excel and Microsoft Dynamics GP

TitaniumGP's Copy and Paste brings the ease of copy and paste into Microsoft Dynamics GP transactions while eliminating mundane and error-prone data entry.

Import detail lines by pasting them directly into over 60 GP windows, including:

- * Journal Entries
- * SOP Entry
- * Purchase Orders
- * PM Transactions

DO YOU NEED THE GP YEAR-END UPDATE?

The year-end updates for Microsoft Dynamics GP versions 2013, 2015 and 2016 are now available on [Microsoft CustomerSource](#). You will need the update installed if you:

- want to keep your version of GP on the latest service pack - an advantage in an upgrade scenario
- print 1095-C's using GP (you are not using another product like Greenshades or Integrity Data for ACA reporting)
- use the Fixed Asset module in GP and have luxury automobiles
- use GP to electronically upload Federal W-2's

If you would like our help with the year-end update, please [contact us](#) as soon as possible to get on our schedule. If you plan to do your own update, make sure you back up all databases before starting the installation.

2017 YEAR-END BLOG SERIES

It's time to start thinking about Year-End again! The Microsoft Dynamics GP Support Team has published blog articles with year-end closing information to assist you with planning for a smooth year-end close.

These articles include general questions about year-end processes for that module, and any changes that may affect your Year-End processes for the 2017 year.

- * Receivings
- * Inventory Transactions
- * Inventory Transfer
- * Inventory Kits

For some GP Windows, even fields that are not in the first detail window can be imported, like Serial or Lot Numbers, Expiration Date, Distribution Account, etc.

You have to see it to believe it.
