

# Microsoft Great Plains 8.0

## Minimum, Midpoint, High-End Recommendations

Last Modified 4/21/2004 5:00:07 PM

Posted 4/20/2004 1:55:00 PM

Included are compatible hardware recommendations based on usage.

### Overview:

This document contains hardware requirements and recommendations supported by Microsoft® Business Solutions. The following are the minimum requirements, midpoint recommendations, and high-end recommendations for client/server installations of Microsoft Great Plains Professional 8.0 on Microsoft SQL Server and Microsoft Great Plains Standard 8.0 on Microsoft SQL Server or MSDE 2000. The recommendations are based on experience with many different installations and should be used as a reference in determining hardware needs for each individual configuration. Users may need to increase these recommendations due to environmental factors to achieve individual performance expectations.

## Client Requirements:

Item	Requirements	Notes
	Microsoft Windows XP	

<b>Operating System</b>	Professional SP 1a, Microsoft Windows XP Tablet PC Edition, Microsoft Windows 2000 Professional SP 3 or SP 4, Microsoft Windows 2000 Server SP 3 or SP 4, or Microsoft Windows Server 2003 Standard Edition	The Microsoft Windows XP Tablet PC Edition is only supported on a client connected to the Local Area Network. The wireless components of Microsoft Windows XP Tablet PC Edition are not supported or recommended.
<b>Processor</b>	Pentium III 350 Mhz (or equivalent)	Clients with heavy processing use Pentium III 500 Mhz or higher
<b>Hard Disk Space</b>	210 MB	An additional 35 MB of hard disk space is required if using Human Resources. An additional 50 MB of hard disk space is required if using Manufacturing.
<b>RAM</b>	128MB	Clients with heavy processing use 256 MB RAM or higher. Set virtual memory size to at least the amount of RAM on the workstation plus 11 MB.
<b>Video</b>	SVGA (800x600) with 16-bit video driver	
<b>CD-ROM</b>	Optional	
<b>Network Card</b>	100 Base T or 1000 Base T Ethernet	

[Top](#)

## Small Business Server Recommendations

Microsoft Windows 2000 Small Business Server SP 3 or SP 4  
 Microsoft Windows Small Business Server 2003 Premium Edition

Use the following guidelines if you:

- Use only Financial Series modules
- Have between 0-10 concurrent users
- Use Report Writer or Crystal Reports
- Process fewer than 500 transactions per day
- Import very little data
- Recommend a dedicated Microsoft SQL Server or MSDE 2000 for the Great Plains databases.
- Recommend minimum server requirements (see below) plus server requirements required by Small Business Server.

[Top](#)

## Minimum Server Requirements:

Use the following guidelines if you:

- Use only Financial Series modules
- Have between 0-15 concurrent users for Microsoft SQL Server or 0-10 concurrent users for MSDE 2000
- Use Report Writer, Crystal Reports or FRx
- Process fewer than 500 transactions per day
- Import very little data
- Dedicated server with Microsoft SQL Server only
- Recommend a dedicated server with MSDE 2000 only

## Database Requirements

Microsoft SQL Server 7.0 SP 4

Microsoft SQL Server 2000 Standard Edition SP 3a

Microsoft SQL Server 2000 (64-bit)

MSDE 2000 SP 3a

Item	Requirements	Notes
<b>Operating System</b>	Microsoft Windows 2000 Server SP 3 or SP 4, Microsoft Windows Server 2003 Standard Edition	MSDE 2000 can be installed on a non-server operating system, however it is recommended to install on a server operating system. The only non-server operating systems supported are Microsoft Windows XP Professional SP 1a and Microsoft Windows 2000 Professional SP 3 or SP 4
<b>Processors</b>	Dual Pentium III 800 Mhz (or equivalent)	Make sure processors can be upgraded
	Minimum:	
<b>Disk Configuration</b>	RAID 5 for operating system, applications and SQL database log and data files	Having more disks available will improve Microsoft SQL Server performance
<b>Microsoft SQL Server only</b>	Recommended:  RAID 1 for operating system and applications	Recommend using a dual-channel fast and wide SCSI-2 controller.

	RAID 5 for SQL database log and data files	
<b>RAM</b>	512 MB minimum or greater	Set virtual memory size to at least the amount of RAM on the computer plus 11MB. Be sure to expand to 1G if necessary.
<b>CD-ROM</b>	Yes	Required
<b>Network Card</b>	32-bit, 10/100 MB Ethernet Full Duplex	

---

[Top](#)

## Midpoint Server Recommendations:

Use these guidelines if you:

- Use Financials Series modules
- Use Distribution Series modules moderately
- Use Field Service Series modules
- Use Manufacturing Series modules moderately
- Have between 10 and 30 concurrent users
- Use Terminal Server
- Use Report Writer, Crystal Reports or FRx
- Perform some online analytical processing (OLAP) cube generation
- Using an import routine/eConnect/Integration Manager
- Process between 500 and 2000 transactions per day
  - Originating in Sales (SOP and/or RM), Payables or General Ledger
- Dedicated server with Microsoft SQL Server only

## Database Requirements

Microsoft SQL Server 7.0 SP4

Microsoft SQL Server 2000 Standard or Enterprise Edition SP 3a

Microsoft SQL Server 2000 (64-bit)

Item	Recommendations	Notes
<b>Operating System</b>	Microsoft Windows 2000 Server SP 3 or SP 4, Microsoft Windows 2000 Advanced Server SP 3 or SP 4, Microsoft Windows Server 2003 Standard	

<b>Processors</b>	Edition or Microsoft Windows Server 2003 Enterprise Edition Dual Xeon 700 Mhz (or equivalent) RAID 1 for operating system and applications (2 disks)	Make sure processors can upgrade to Quad processors
<b>Disk Configuration</b>	RAID 1 for SQL database log files (2 disks) RAID 5 for SQL data files (4 disk minimum) RAID 1 for TempDB (2 disks) - optional, but recommended RAID 0 for SQL backups (full and log) (2 disks)	Having more disks available will improve Microsoft SQL Server performance  To attain 2000 transactions a day, you may need to increase the number of disks in your RAID 5 disk volume  Recommend separate disks for database backups and transaction log dumps  Recommend use of Ultra SCSI 3 or Fiber Controller
<b>RAM</b>	2G or more	If more then 2 GB of RAM is available, enable the 3GB and/or PAE switch in the boot.ini if Windows 2000 Advanced Server, Windows Server 2003 Standard Edition or Windows Server 2003 Enterprise Edition and SQL Server Enterprise Edition are installed. Refer to Article <a href="#">Q283037</a> for more information. Be sure to expand to 4GB if necessary.
<b>CD-ROM</b>	Yes	Required
<b>Network Card</b>	Dual 100-bit 10/100 MB Ethernet or Fiber PCI NIC	Ensure switch is capable of handling network traffic

[Top](#)

## High-End Server Recommendations:

Use these guidelines if you:

- Use Financials Series and Distribution Series modules extensively
- Use Field Service Series and Manufacturing Series modules extensively
- Have 25 or more concurrent users
- Use Terminal Server/Metaframe
- Use Report Writer, Crystal Reports or FRx extensively
- Use an import routine extensively - eConnect
- Process 2000/5000 transactions per day
  - Originating in Sales (SOP and/or RM), Payables or General Ledger
- Perform online analytical processing (OLAP) cube generation (to different machine)
- Dedicated server with Microsoft SQL Server only

### **Microsoft SQL Server Enterprise Recommendations**

Microsoft SQL Server 2000 SP 3a

Microsoft SQL Server 2000 (64-bit)

Item	Requirements	Notes
<b>Operating System</b>	Microsoft Windows 2000 Advanced Server SP 3 or SP 4, Microsoft Windows Server 2003 Standard Edition or Microsoft Windows Server 2003 Enterprise Edition	
<b>Processors</b>	Quad Xeon 700 Mhz (or equivalent)	Make sure processors can be upgraded to 8 processors or higher
<b>Disk Configuration</b>	RAID 1 for operating system and applications (2 disks) RAID 1 for SQL database log files (4 disks) RAID 1 for TempDB (4 disks) RAID 0 for SQL backups (full and log) (2 disks) RAID 5 or RAID 10 for data files (8 disks or more)	Having more disks available will improve Microsoft SQL Server performance  To attain 5000 transactions a day, you may need to increase the number of disks in your RAID 5 or RAID 10 disk volume  Recommend separate disks for database backups and transaction log dumps

		Recommend use of Ultra SCSI 3 or Fiber Controller
		Enable the 3GB and/or PAE switch in the boot.ini if Windows 2000 Advanced Server, Windows Server 2003 Standard Edition or Windows Server 2003 Enterprise Edition and SQL Server Enterprise Edition are installed. Refer to Article <a href="#">Q283037</a> for more information. Be sure expand to 8G if necessary.
<b>RAM</b>	4G or more	
<b>CD-ROM</b>	Yes	Required
<b>Network Card</b>	Single 1000 Base T Ethernet or Fiber PCI NIC	Ensure switch is capable of handling network traffic

---

#### Additional Notes:

1. This document represents configurations tested by Microsoft Business Solutions and supported by Technical Support. Use of technologies not specified in this document is not recommended and will not be supported. Testing is ongoing, and as newer technologies become supported, they will be added to this document.
2. Office 2000, Office XP and Office 2003 have been tested and are supported with Great Plains 8.0.
3. Microsoft Business Solutions will support Great Plains 8.0 on Windows Server 2003 with Microsoft SQL Server 2000 Service Pack 3a or MSDE 2000 SP 3a. Microsoft SQL Server 7.0 is not supported on Windows Server 2003.
4. Intel Pentium processors are used in platform testing, however, the compatibility is based on the speed of the processor not the type of processor.
