**TAKE ADVANTAGE OF
YOUR SERVICE PLAN
BENEFITS TODAY
THROUGH
CUSTOMERSOURCE**

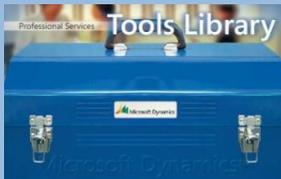

**SAVE UP TO 75% ON GP PAYROLL AND
WORKFLOW ENHANCEMENTS**

Integrity Data is THE Microsoft Dynamics GP  Payroll and HR expert, providing applications and services to take GP Payroll and HR from GOOD to GREAT!

Included as a benefit of your organization's service plan for Microsoft Dynamics, **CustomerSource** is a secure site that gives you access to unlimited training courses and **self-support resources like the knowledge base & unlimited training courses**. Just as important, it provides **access to downloads and updates** such as timely tax and regulatory releases that may be necessary to help your organization remain compliant. Click on the following link to get easy to follow step by step instructions on how to access CustomerSource.

[Microsoft CustomerSource](#)

VALIDATE CUSTOMER PO NUMBERS

One of the great tools available in the Dynamics GP Professional Service Tools Library is the Customer PO Validation tool. This tool will check the Customer PO Number in SOP to see if it has been previously used.

Here's an [article](#) from David Musgrove that describes how to implement and use the PO validator.

Discover what Negative Payroll Transactions, Paycheck "What If" Calculator, Negative Deductions Enhancement, FTE Manager, Enhanced Retirement Plans and Mid Pay Period Rate Changes can do to maximize the efficiency of your Payroll and HR departments.

What is U-LINC? [U-LINC](#) is workflow automation software that automates business processes within Microsoft Dynamics GP and delivers real-time notifications. Create customized workflows to meet your needs, or use out-of-the-box configurations. (Discount offer does not include U-LINK application.)

See what's available in Integrity Data's [catalog](#). Contact [Dwight Boudreaux](#) for more information on this great offer.

DYNAMICS GP'S "OTHER" SECURITY

Account-Level Security' (or ALS) is a great way to manage your account structure and protect sensitive financial information based on the user's position in the company structure. ALS allows managers to limit user access to only certain account sets, thereby preventing errors and securing confidential information.

Click [here](#) to read the GPUG tip that will give you an overview and instructions to enable account-level security.
