ANNOUNCING GPUG AMPLIFY

May 23–25, 2016

Anaheim, CA

Amplify was driven by demand from the Dynamics GP end-user community after the announcement of the transition from Convergence to Envision. This event gives sponsors a unique opportunity to connect with a passionate group of users looking to amplify their Dynamics GP success through new ideas, solutions, and products.

Amplify offers:

- Your first look at Microsoft Dynamics GP 2016
- A focus on future versions of Microsoft Dynamics GP
- Microsoft-led sessions on the Roadmap of Dynamics GP and surrounding technologies
- Additional community-led [educational sessions](#)
- [Pre-](#) and [Post-Conference](#) Academy instructor-led training
- [DynamicsPro Certification Exams](#)
- Networking & Partner Solutions

GREAT NEW FEATURES COMING IN DYNAMICS GP 2016

The Microsoft Dynamics GP 2016 release date is set for April 2016. With it comes the expanded features, new functionality and of course overall improvement to the user experience and business usage that we come to expect from the latest and greatest software version.

Here are just a few of the new enhancements:

- Import/Export SmartLists from Designer - In GP 2016, the user will be able to shave a little time off reporting with the functionality to export and import SmartList definitions created with a SmartList Designer from one install to another.
- SmartLists from Favorites - This feature reduces mouse-click in routine processes by allowing users to create a new SmartList from a favorite using Designer. Users will find it more convenient to not have to remove all of the extra columns from the default SmartList.
- Power BI Reports on Home Page - Get a quick snap shot of the data you care about most with this feature that allows users to see Power BI Reports right from their home page.

A screenshot of a software window titled 'Payroll Vendor Setup'. The window has a blue title bar and a menu bar with 'File', 'Edit', 'Tools', and 'Help'. The main area contains several input fields: 'Transaction Type' is set to 'Company Deduction'; 'Employee Name' is empty; 'Deduction Code' is '401K'; 'Description' is '401(k) Deduction'; 'Vendor' is 'ASSOCIAT0001'; 'Vendor Name' is 'Associated Insurance Inc.'; and 'Voucher Description' is 'Ded Code+Ck Date'. There are navigation buttons at the bottom.

Dynamics GP's Payroll Integration to Payables (PIP) saves time by automatically creating purchasing transactions for payroll liabilities (such as taxes and garnishments) each time you do payroll, and it's simple to set up.

Click [here](#) to read a great article by Christina Phillips that will give you complete setup instructions. Please call us if you have any questions about PIP.
