HOW TO SAVE AND PRINT SOP DOCUMENTS IN ONE STEP

From Mariano Gomez, Dynamics GP Blogster

How many times have you wished you could save and print a sales order, a fulfillment order, or an invoice document, with their corresponding packing slips and picking tickets all in one step? The **SOP Quick Print** feature offers just that!

To access the setup window, click on the **Options** menu on the **Sales Transaction Entry** screen, then select Quick Print Setup. You can configure additional options even for packing slips and picking tickets, along with report output settings. You can also choose to let the document remain on the screen even after printed.

Once configured, you can then begin to enter your documents or select previously entered ones, then hit **CTRL+Q** from your keyboard. That's it! Your document is saved then printed, all in one step! One of the most important benefits of this feature is, you don't need to create your own customization.

In the world of sales tax, 2018 will be remembered as a big year for change.

The Supreme Court upended the long-standing precedent that companies need physical presence in a state before they're required to collect and remit sales tax.

And nexus isn't the only thing in flux as we enter the fiscal new year. Sales tax changes for marketplace sellers, new tax amnesty programs, and changes to tax on services are also making headlines.

Our partner at Avalara researched and compiled the latest changes to state rules that could change the way you manage your business.

"**2018 Sales Tax Changes: Mid-Year Update**" highlights the major changes happening now and provides analysis and predictions for what's in store.
