## AFFORDABLE CARE ACT WEBINAR

Concerned about how your company will manage the new tracking and reporting requirements for the **Affordable Care Act**?

Greenshades is hosting a series of 15 minute webinars on the ACA requirement and how they can help.

9/15 at 2:00 PM  
9/16 at 11:00 AM

## NEW RIBBON FEATURE IN DYNAMICS GP 2013 R2

There is a new ribbon feature available in Dynamics GP 2013 R2, the **Action Pane**.

Get the details [here](#) in a great article by Ross Balstad with the Microsoft Dynamics GP Community.

We're here to answer any of your questions about this latest release and help plan your upgrade if you haven't already upgraded. Please give us a call with your questions.

## SELECT SMARTLIST COLUMNS BY TYPE

Save time when adding columns to a SmartList Favorite by sorting fields by type. For example, if you know you are looking

Session space is limited  
so click [this link](#) now to  
reserve a seat.

## GP EXCEL BUDGET WIZARD VIDEO

In case you didn't know,  
the Excel Budget  
Wizard makes  
budgeting quick and  
easy.

This [short video](#) shows  
you the basics.

Please contact us with  
any questions on Excel  
Budgets in GP.

for a Currency value, sort by type and review all of the available  
Currency fields.

- Open the Columns list to select new columns for the SmartList.
- Click on the Type column label and all of the data columns will be sorted by type.
- Scroll down to the desired type and look for your field.

## USE THE PROCESS MONITOR TO SEE WHAT'S RUNNING

Dynamics GP will run various tasks in the background and sometimes it seems that nothing is happening, especially when printing large reports.

Check the Process Monitor (Microsoft Dynamics GP>Process Monitor) to see what tasks are running or waiting to run.

Tasks with a (>) sign in front of them can be deleted (useful if you have run a report several times while waiting for it to print). Highlight the process and click Remove.
