ACTivReporter is a combined financial reporting and data analysis tool offering speed and flexibility at a budget-friendly cost.

Build financial reports with real-time data in a single step:

- Excel-based reports allow for easy building
- Automated distribution
- Translate your MR reports

More than a financial reporting tool:

- Live trial balance always ready
- Drilldown and drillback directly into GP
- Multi-company viewing
- Extensive security

MANAGE AND CHANGE PAYROLL POSTING ACCOUNTS QUICKLY

A new navigation list was added in Microsoft Dynamics GP 2016 that enhances a user's ability to view, sort, search, set up, and edit their Payroll Posting Accounts. This new **Payroll Posting Accounts Navigation List** is a great new way to manage your Payroll Posting Accounts and allows users to import and export their Payroll Posting Accounts setup.

Payroll Posting Type	Equipment	Payroll	Payroll Code	Account Number	Description
General Payroll	ALL	ALL	ALL	200-1100-00	General Payroll
Federal Tax Withholding (FICA)	ALL	ALL	200-1100	200-1170-00	Federal Withholding Payable
Federal Tax Withholding (FICA)	ALL	ALL	200-1100	200-1170-00	Federal Withholding Payable

[zoom...](#)

For example, a user can export their setup, make changes in Excel, and then import those changes back into the system. [Read Isaac Olson's article](#) that gives more information and instructions on how to use this list to save time and quickly retrieve information about your payroll posting setup.

HOW TO FIND DUPLICATE VALUES IN EXCEL

Use conditional formatting to find and highlight duplicate data. That way you can review the duplicates and decide if you want to remove them.

Select the cells you want to check for duplicates. **Note:** Excel can't highlight duplicates in the Values area of a PivotTable report.

Click Home >Conditional Formatting >Highlight Cells Rules >Duplicate Values.

Discover the speed and agility ActivReporter can provide in this [demonstration video](#).

For more information, call Tommy Tastet at 985-892-2710 or email him at tommyt@diamond-soft.com.

USE SAFEPAY TO PREVENT BANK FRAUD

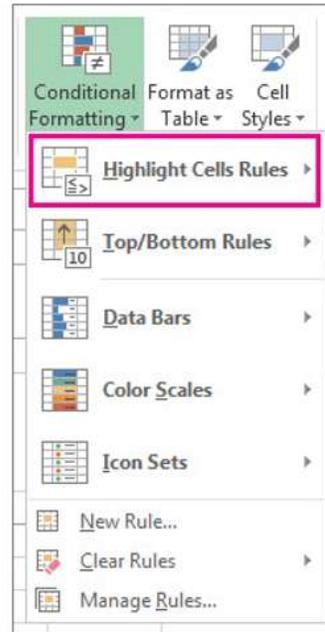

SafePay (Positive Pay) is a module in GP that allows you to create an electronic file containing details of the cash transactions entered into GP for a specified period of time. This file can then be sent to your bank to compare to the items presented to the bank for verification. This provides additional security, ensuring that only valid payments are made from your account.

If you aren't already using SafePay (most banks now require this type of verification), [here is the setup guide](#). We would be happy to assist you with the setup and implementation, so [contact us](#) if you need help.
